

**SIGN UP ONCE\*\* AND FORGET ABOUT IT!**

---

**INTRODUCING IMPROVED Lobo-WiFi**

---

**Available to:**

**Faculty, Staff, and Students**

---

**Campus-Wide Roll-out**

**August 27**

### How do I connect to the New Lobo-WiFi?

1. If you are a UNM student, faculty, or staff, please use your netid and password to login.
2. Ensure wireless is turned on, and forget the current Lobo-Wifi, then select the Lobo-WiFi (secured) from the list of wireless networks.

---

#### Apple OS X

- View available (and select) wireless network
- Click on the Airport icon
- Select "Lobo-WiFi"
- Settings will be auto detected
- Enter your UNM NetID and password
- Accept server certificate if asked

#### Apple iPhone iOS

- View available (and select) wireless network
- Select Settings
- Select Wi-Fi
- Select "Lobo-WiFi"
- Settings will be auto detected
- Enter your UNM NetID and password
- Accept server certificate if asked

#### Android device

- View available (and select) wireless network
- Open device Settings
- Under "Wireless & networks," touch Wi-Fi
- Make sure the Wi-Fi switch is in the On position
- Select "Lobo-WiFi"
- Fill in SSID Settings
- EAP Method field, select PEAP
- Phase 2 Authentication field leave as None
- CA Certificate field leave Unspecified
- Identity is UNM NetID
- Anonymous identity leave blank
- NetID Password
- Accept server certificate if asked

#### Windows Machine

- View available (and select) wireless network
- Select Control Pane
- Select Network Connections
- Wireless Network Connection
- View Wireless Networks (button)
- Select "Lobo-WiFi"
- Enter your UNM NetID and password if prompted

---

**\*\*Remember that only when your password expires or is changed, or you forget the SSID, you will have to enter your credentials again to login.**
